

Basudev Mondal

Web Developer

Creative and detail-oriented web developer with experience in building modern, user-friendly applications using Next.js, Node.js, TailwindCSS, JavaScript, MySQL and related technologies.

I focus on developing AI-powered solutions and scalable web architectures, with growing expertise in prompt engineering to create smart, context-aware applications. My projects reflect strong technical skills, a passion for problem-solving, and a drive to deliver smooth digital experiences.

Projects & Hackathons

Grocery Bazaar – E-commerce

Website (Academic Project)

Salesian College

Jan 2022 – Mar 2025

Siliguri West Bengal, India

- Developed as the main academic project using Next.js, TailwindCSS, ShadCN UI components, Supabase, and Strapi for a full-stack architecture.
- Implemented responsive product listing, cart, checkout, and authentication system for secure user access.
- Added debounced search functionality for faster product discovery and an integrated payment gateway for smooth transactions.
- Designed a highly responsive, modern UI optimized for both desktop and mobile, ensuring a seamless shopping experience.
- Focused on building a scalable and clean architecture to handle future growth and feature expansion.

Clarity AI – News Verification Platform (24Hrs Hackathon Project)

Siliguri & Kolkata Hackathon (AIGNITE)

Apr 2025

- Designed and developed the UI for a news aggregator that filters, organizes, and verifies the authenticity of news.
- Built with Next.js, TailwindCSS, and ShadCN UI components, ensuring a clean and modern design.
- Made the interface fully responsive across desktop, tablet, and mobile devices for better accessibility.
- Applied UI/UX best practices to improve readability and user flow during news consumption.
- Secured 5th position among multiple competing teams.

ALGOpro – AI-Powered Algorithm Generator (Personal Project)

Sep 2024 – oct 2024

- Created a web platform using Next.js, JavaScript, and TailwindCSS to generate algorithms from raw code input.
- Integrated Gemini API with custom prompt engineering techniques to provide optimized, step-by-step algorithmic solutions.
- Added support for multiple programming languages, making the tool flexible for different coding needs.
